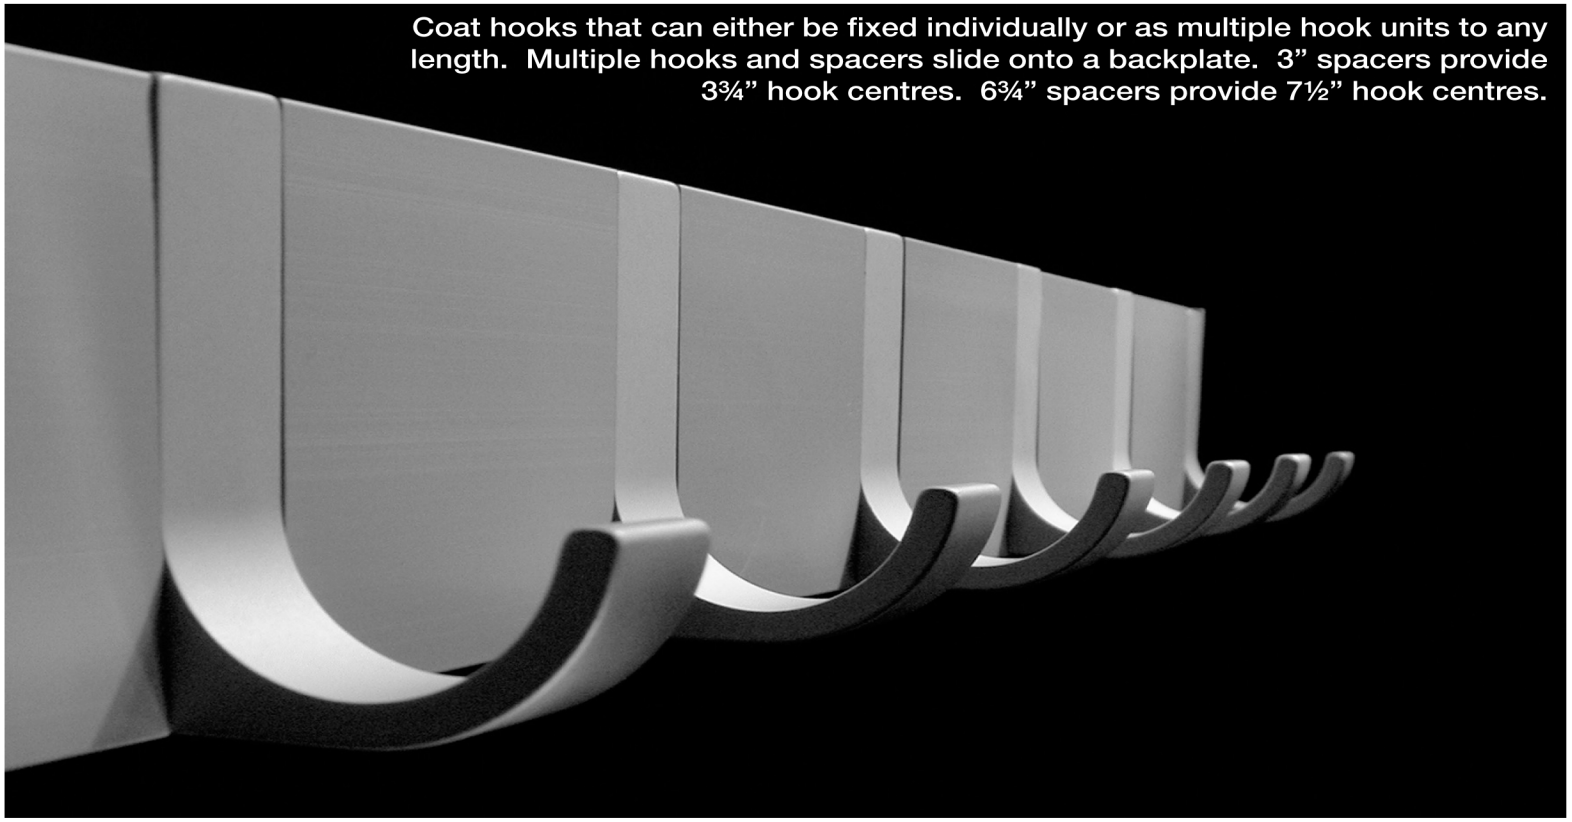
variset single & multiple hooks
single and multiple coat hooks



Coat hooks that can either be fixed individually or as multiple hook units to any length. Multiple hooks and spacers slide onto a backplate. 3" spacers provide 3¾" hook centres. 6¾" spacers provide 7½" hook centres.

Hooks, spacers and backplates are all extruded aluminium and can be finished as satin anodised or powder coated in colour combinations from the full RAL range. Single hook **mounting blocks** are moulded ABS. Single hook mounting blocks and end caps for rails come in grey or black. For **fixing** single hooks use the integral moulded ABS block screw-fixed to the wall, onto which the hook is secured with a grub screw. Multiple hooks use a hidden backplate which is first screwed into position, then hooks with spacers are slid onto it and are finished with a steel end cap. Available **accessories** are numbered spacers/hooks, as are special spacers for corners and recesses.
